

PROGRAMS FOR TEAMS TO GET CLEAR, GET RECOGNIZED, & REAP REWARDS!

In-Person, Off-Site & Virtual Strength Based Leadership to Elevate Engagement

Book this in-depth off-site designed retreat to connect, inspire, and bond your team and increase synergy and action. Designed to elevate your existing team to a high-functioning and engaged team that works with clarity and purpose, these programs are combined to offer learning without the distraction of the office.

STRENGTHS MATTER TO INNOVATE

Get Teams unstuck and out of group think by identifying what sets each member apart in the best way. Valuing the differences each offers catapults ideas and creativity to new heights. Innovation depends upon it. This workshop includes assessments, individual debriefs, team engagement, and team reports.

BUILD INFLUENCE

Using a 5 step process, gain greater results when you connect your talent to the right story, allowing you to also leverage the talents and value of your workforce to attract and gain new clients. This fun approach is honest story telling – and gets results.

WHY ASKING WORKS

Using The ASK Framework book, new research introduces a method to help every employee and leader communicate and connect with more accurate information that identifies unique value in others while making them feel seen, heard, and valued. This workshop provides questions that enhances all professional relationships within your organization and with clients. Includes books for each attendee.

INDIVIDUAL COACHING FOR HIGHER ROI

When a workshop is over, the techniques and lessons are often lost as daily life takes hold again. To ensure that every moment spent learning is integrated, add individual coaching after your workshop. Regularly tapping into how new ideas are put to use will increase strength awareness, sustain innovative thinking, and elevate performance.

"I loved the practical strategies shared. I've completed other strength-finder type of sessions, but this one really got my creative juices flowing! Overall, a very positive, insightful, and educational experience."
